

Your Job Each Turn

*You run the parts of the game that aren't any single player's turn, in order:*

- 1. Trade Income — calculate and distribute (see below).
- 2. Bandit Mechanics — grow, convert, act, spawn (Side B).
- 3. Break ties — Council vote, Bandit Army targets, anything not explicitly resolved.
- 4. Resolve timers — confirm every player advances their Build / Repair / Truce / Siege / Muster / Sack / Capture timers in the Empire Phase.

Passing the Host

After your Rest Phase, pass the Host token (and this card) clockwise. Skip all Host duties in Spring — no Host, Bandits, Trade Income, Council, or Diplomacy actions; Spring grants +1 Envoy instead.

Trade Income

- WHO**Both players border each other, both have active Dirt Roads (or a faction/spec exception), and a signed Trade Agreement.
- INCOME**For each Trade Agreement, BOTH players gain 100 × the Host's Craft X.
- WHEN IT FLOWS**
  - Just signed: the player who did NOT perform Sign Treaty gets income the next time they are Host; both flow normally thereafter.
  - Just ended: the player who ended the treaty gets income the next time they are Host, then it stops.
  - No trade income in Spring. Tax is collected in Winter.

Quick Tie-Breakers

| Situation                    | Resolution                               |
|------------------------------|------------------------------------------|
| Council vote tied            | Host casts deciding vote                 |
| Bandit Army equal targets    | Host chooses                             |
| Players tied for 'highest X' | Host chooses                             |
| Spawn placement ambiguous    | Apply rules; if still tied, Host chooses |

Phase Order

- 1. Grow existing Bandit Camps (table at right).
- 2. Convert any Camp at 25+ retinues into a Bandit Army.
- 3. Act — each Camp/Army of 10+ retinues performs a Cunning Action (d3); each Bandit Army performs a Move.
- 4. Each Spring, every player gains a Bandit Camp. When a Bandit Camp is spawned in Spring, it immediately performs a Raze action at a base influence of 1 targetting the closest settlement.

Cunning & Domain Value

For every 5 Retinues in the Bandit Camp or Army, the Bandit Camp has +2 Cunning and +2 Prowess.

CUNNING ACTION — CAMPS/ARMIES OF 10+ (ROLL D3)

- 1 — Intercept Caravan
- 2 — Raze
- 3 — Destabilize

*All players Abstain Bandit actions; innate modifiers can still apply and may cause a Fail.*

Bandit Army & Attacking

After bandit mechanics, a Bandit Army performs a Move: Skirmish (player army in range) > Lay Siege (player settlement in range) > March (toward closest army/settlement). Host breaks range ties.

ATTACKING A CAMP

Move to end adjacent to a camp; another player rolls bandit tactics (d6, 7 = Fall Back) and resolves to-hit/save as a Battle. Bandits never Fall Back but may Flee. Extort the camp's gold if destroyed.

Growth Table

| Realm Era | Retinues / turn |
|-----------|-----------------|
| Founding  | +1              |
| Ascension | +2              |
| Eminence  | +5              |
| Zenith    | +10             |

*New Camps start at 5 retinues. Camps and Armies grow each turn but never exceed 25; a Camp becomes a Bandit Army at 25. After casualties they regrow toward 25.*

Armament by Realm Era

| Realm Era | Equipment                              |
|-----------|----------------------------------------|
| Founding  | Cudgels + Cloth                        |
| Ascension | Arming Swords + Kite Shields + Leather |
| Eminence  | Halberds + Chainmail                   |
| Zenith    | Battle Axes + Full Plate               |

Key Bandit Values

| Key value       | Current                                |
|-----------------|----------------------------------------|
| Camp start size | 5 retinues                             |
| Becomes an Army | 25+ retinues                           |
| Cunning trigger | 10+ retinues                           |
| Domain Value    | +1 Cunning & +1 Prowess per 5 retinues |
